

DVX-1000
(DVR-1000)

Date: February 2012

Number: 09.12ce 1/2

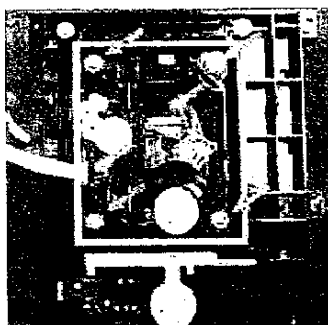

Substitute Parts Introduction for Traverse Unit

PURPOSE: Under current stock shortage of loader ass'y for DVX-1000, alternative solution to replace only with traverse unit which is one assembly part of loader ass'y is introduced. The substitute traverse unit is compatible with original one.

PROCEDURE:

- 1) Remove 4 screws mounting traverse unit in "WQ467000" together with cable and cushion rubber. (Fig 1)
- 2) Replace original traverse installed in the loader ass'y for DVX-1000 with the substitute traverse unit removed from "WQ467000". (Fig 2)
- <Note> Original screws and cushion rubbers in DVX-1000 should be used.
- 3) Be sure to remove solder short for electrostatic damage prevention. (Fig 3)
- 4) Other procedure is the same as instructed in service manual.

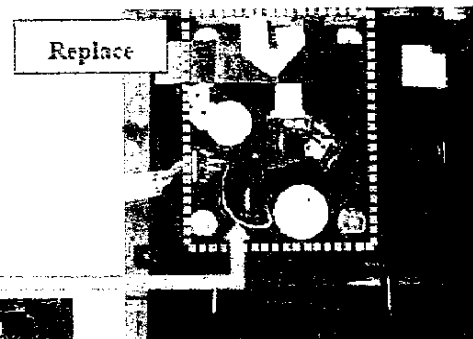

DVD MECHANISM UNIT (WQ467000)

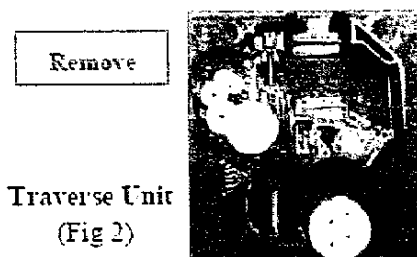

① : Screw, Cushion rubber
② : Cable
